The Vibrations of my Soul

The Images are the results of a search for the Truth,
search for the Light, search for the self in the inner self.

They represent my inner state, my visions and intuitions
on the material plane.

They are impressions of my inner voice, vibrations of my soul consciousness, they represent my closeness to the Cosmic.

When I create I have to go outside of myself, surpass
myself, I am in different regions, where I receive particles and celestial elements, which go on vibrating
and working through me.

The images are only distant reflections of those vibrations.

Through my pictures I would like to raise your vibrations
in your soul.

I want to awaken your superior nature, the one that is
luminous, pure and meaningful.

My desire is to represent these vibrations and spread
the Light.

If you are Light, you will go towards the Light.
That will be the proof of my effort.

FEEL YOUR VIBRATIONS !
